High-Definition Wireless Ultrasound for Facial Aesthetics

Improve Patient Safety

Clarius handheld ultrasound is the leading choice for aesthetics practitioners to clearly visualize facial and superficial anatomy in real-time to safely guide procedures, including cosmetic fillers.

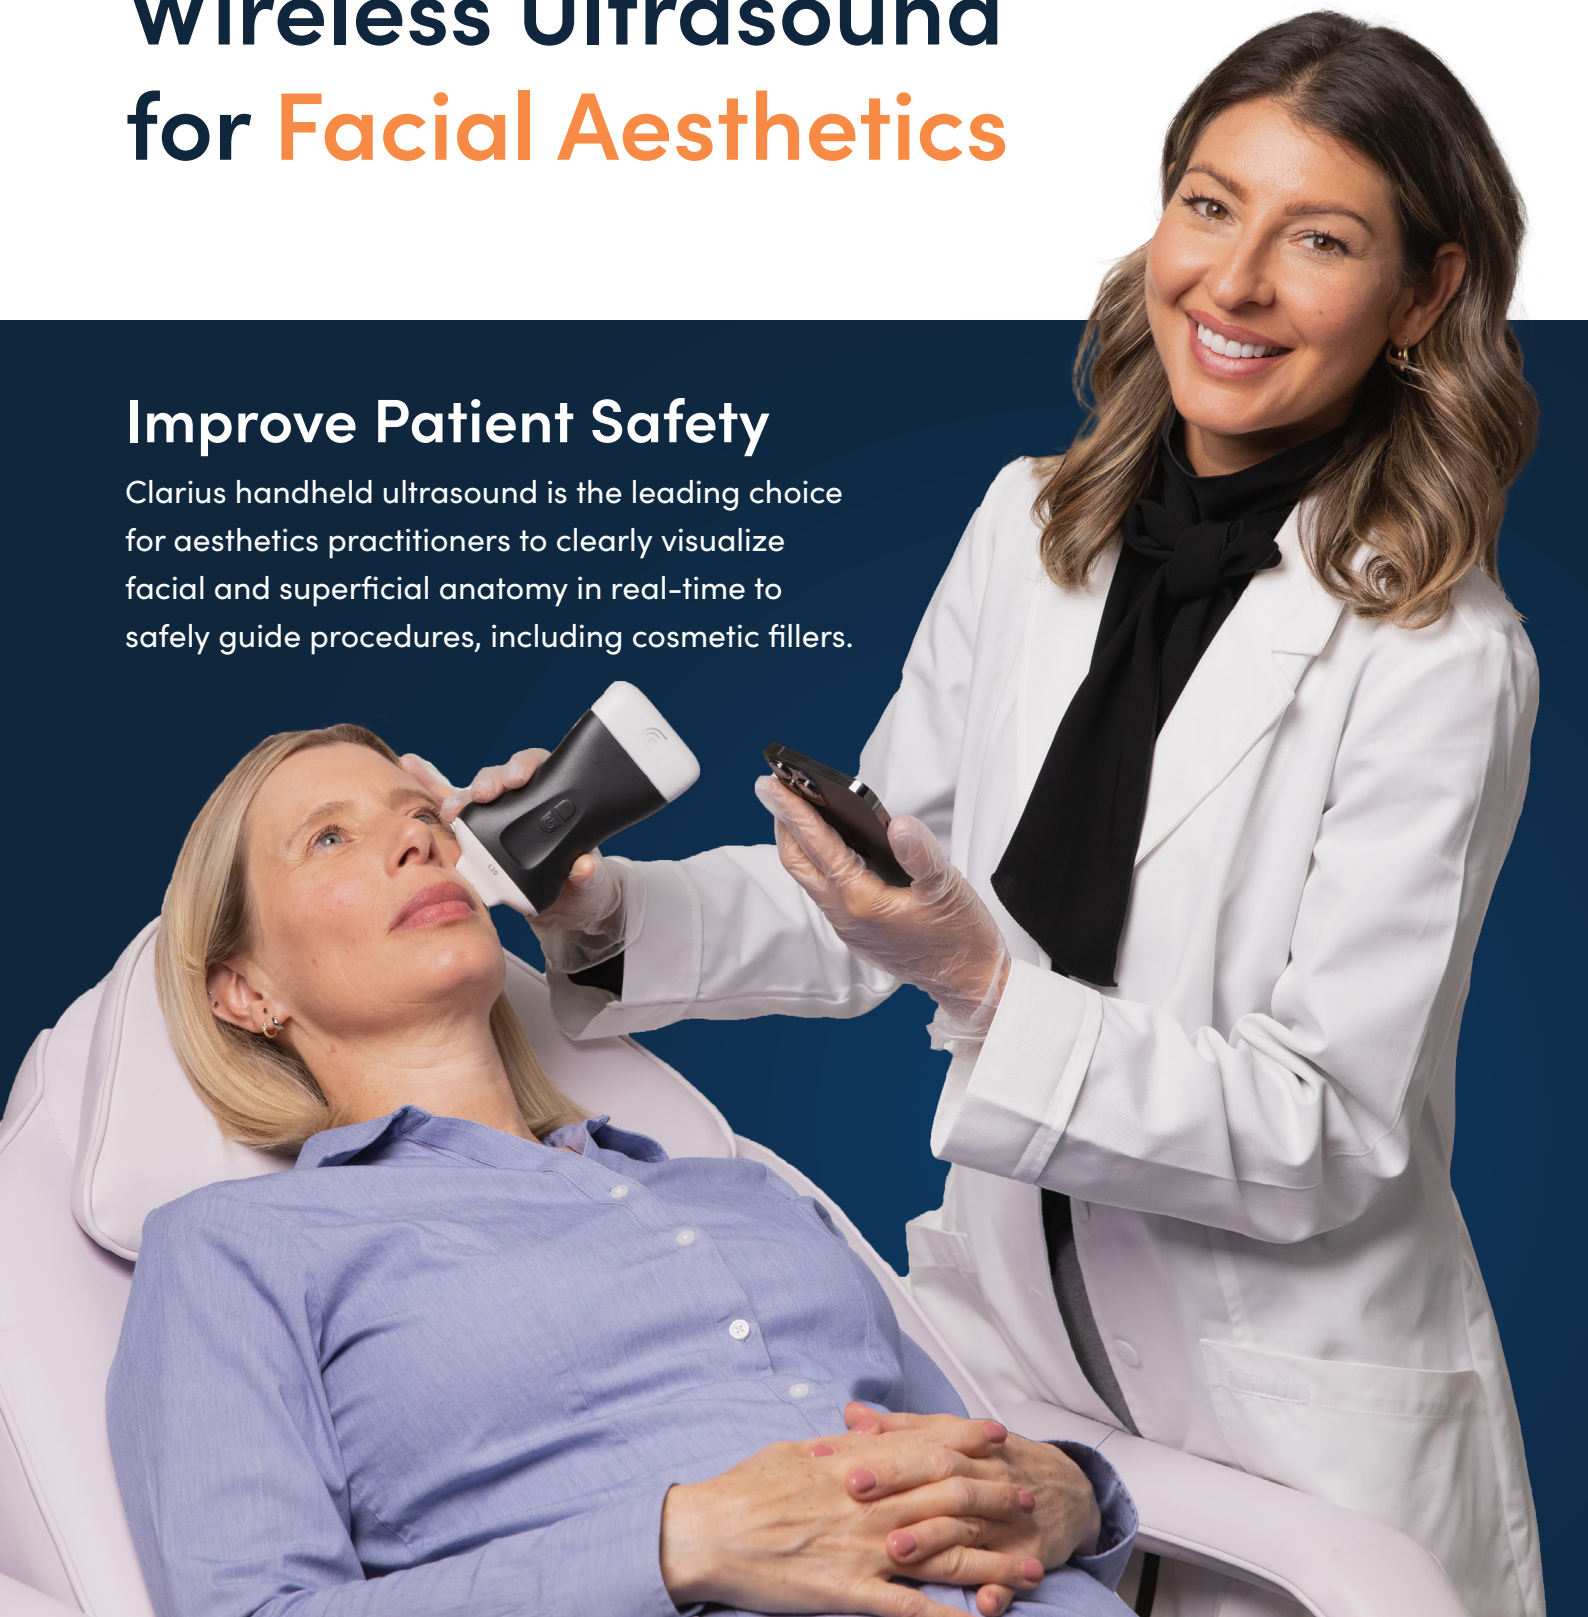

Image Clarity You Can Trust for Facial Aesthetics

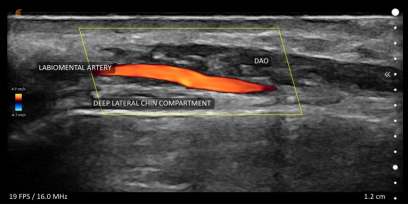

Medical aesthetic practitioners looking to improve patient safety rely on the Clarius L20 HD3 – the world's only ultra-high frequency wireless ultrasound with an Advanced Aesthetic Package. Facial vascular mapping takes just minutes. Impress your patients with clear imaging of the skin, vessels, muscles, and fascia for safe, consistent filler treatments. You'll gain confidence by visualizing your needle placement to avoid vascular occlusions and dissolve unwanted fillers.

- Perform facial mapping to avoid vascular occlusions
- Confirm filler placement and vascularity after injections
- Visualize your needle and nodules to treat complications like vascular occlusions using ultrasound guidance
- Measure dermal thickness prior to microneedling
- Visualize vessels for reconstructive/ cosmetic facial surgery

Weight: 290g (0.64lb)
Dimensions: 147 x 76 x 32mm (5.8 x 3.0 x 1.3in)

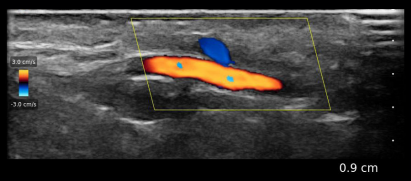

Labiomental Artery

Facial Artery

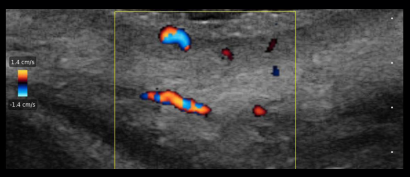

Filler Around Eye

Temporall Artery

Lab Artery

Temporal Vessels

"When I started using the Clarius L20 HD, I saw firsthand the benefits of using ultrasound every day. It's better for my patients because I can place fillers exactly where I want and it's better for my peace of mind because I know I'm performing safe injections every time. I think that ultrasound, particularly Clarius, is going to become the gold standard for filler treatments."

Dr. Steven F. Weiner - Facial Plastic Surgeon

World's First Ultra-High Frequency Scanner for Aesthetics

Clarius Cloud

Manage your exams and build reports anywhere, anytime with unlimited Clarius Cloud storage.

Easy To Use

Friendly AI-powered app for your Apple or Android automatically delivers the best imaging.
